

Eric Julianto

Infrastructure & Operations Engineer | Networking, Monitoring, Virtualization, and Hybrid Infrastructure

Jakarta, Indonesia | ericjulianto00@gmail.com | +62 812 9985 1190

algonacci.github.io | linkedin.com/in/eric-julianto | github.com/algonacci

Professional Summary

Infrastructure and operations-focused engineer with hands-on experience across MikroTik routing, Ruijie switching, Linux systems, Dockerized services, VPN architectures, observability stacks, and hybrid homelab infrastructure. Experienced in infrastructure deployment, troubleshooting, monitoring, virtualization, remote connectivity, and operational workflows spanning networking, telemetry, incident diagnostics, and service operations. Positioned for Infrastructure Engineer, Network Engineer, NOC Engineer, System Administrator, and Technical Operations Engineer tracks.

Core Skills

Networking: MikroTik, Ruijie, VLAN, Routing, NAT, VPN, WireGuard, Tailscale, TCP/IP, Firewall, DHCP, DNS, WAN, Multi-WAN

Monitoring & Observability: Prometheus, Grafana, Loki, Tempo, Zabbix, LibreNMS, SNMP, Telemetry, Log Aggregation, Monitoring Pipelines, Infrastructure Visibility, Alerting

Infrastructure & Virtualization: Linux, Ubuntu, Proxmox, Docker, Virtualization, Hybrid Infrastructure, VPS, Remote Access

Operations: Infrastructure Deployment, Incident Troubleshooting, Service Operations, Remote Support, Monitoring Workflows, Diagnostics

Field & Surveillance: IP Camera, NVR, PoE, Surveillance Networks, VLAN Isolation

Cloud (Supporting): AWS (CCP), Cloudflare, Cloudflare Tunnel

Systems: RabbitMQ, Redis, PostgreSQL, MinIO

Automation & Development: Python, Bash, JavaScript, GitHub Actions

Certifications

- **MikroTik Certified Network Associate (MTCNA)**
- **MikroTik Certified Routing Engineer (MTCRE)**
- **Ruijie Certified Network Associate — Routing & Switching (RCNA-RS)**
- **AWS Certified Cloud Practitioner (CCP)**

Infrastructure Projects

Hybrid Homelab Infrastructure

Homelab

- Built a hybrid homelab environment using Proxmox virtualization, Docker containerization, and Linux-based services for infrastructure experimentation, deployment practice, and operational skill development.
- Configured VPN tunnels with WireGuard and Tailscale for secure remote access across distributed nodes and hybrid cloud connectivity.
- Deployed monitoring stack (Prometheus, Grafana, Loki, Tempo, Zabbix) for centralized monitoring, log aggregation, telemetry-driven infrastructure visibility, and incident diagnostics.

Tech stack: Proxmox, Docker, Linux, WireGuard, Tailscale, Prometheus, Grafana, Loki, Tempo, Zabbix

Multi-WAN MikroTik Infrastructure

Network deployment

- Configured MikroTik-based multi-WAN setup with failover, policy-based routing, and VLAN segmentation for network isolation and traffic management.
- Implemented NAT rules, firewall policies, DHCP servers, and DNS forwarding for structured internal network operations and service continuity.
- Troubleshoot WAN failover behavior, routing loops, and VLAN misconfigurations across production and lab environments.

Tech stack: MikroTik, RouterOS, Multi-WAN, VLAN, NAT, Firewall, DHCP, DNS

Omniflow Infrastructure Stack

Platform infrastructure

- Designed and deployed Dockerized distributed infrastructure spanning PostgreSQL, Redis, RabbitMQ, and MinIO for modular service architecture.
- Built monitoring and observability pipeline with Prometheus, Grafana, Loki, Tempo, and LibreNMS for telemetry, operational visibility, and SNMP-based network monitoring.
- Configured Cloudflare Tunnel for secure external access and PM2 for process orchestration across containerized services.

Tech stack: Docker, PostgreSQL, Redis, RabbitMQ, MinIO, Prometheus, Grafana, LibreNMS, Cloudflare, PM2

Monitoring & Observability Stack

Monitoring infrastructure

- Deployed monitoring infrastructure using Prometheus for metrics collection, Loki for log aggregation, Tempo for distributed tracing, and Grafana for dashboarding and alerting.
- Integrated Zabbix and LibreNMS for SNMP-based infrastructure health monitoring, network device visibility, and operational alerting workflows.
- Configured Grafana dashboards for real-time infrastructure monitoring, alerting, and operational telemetry visualization.

Tech stack: Prometheus, Grafana, Loki, Tempo, Zabbix, LibreNMS, SNMP, Telemetry, Alerting

IP Surveillance & Remote Monitoring Deployment

Field infrastructure

- Configured IP camera and NVR environments with segmented VLAN architecture and remote access integration for surveillance infrastructure.
- Combined VPN and Cloudflare Tunnel connectivity for secure remote monitoring and infrastructure access.

Tech stack: IP Camera, NVR, PoE, MikroTik, VLAN, VPN, Cloudflare Tunnel

Cloudflare Tunnel & Remote Infrastructure Access

Network architecture

- Deployed Cloudflare Tunnel for secure external exposure of internal services without open inbound ports.
- Combined with WireGuard and Tailscale for layered remote access architecture supporting hybrid work and multi-site connectivity.

Tech stack: Cloudflare Tunnel, WireGuard, Tailscale, VPN, Remote Access

MikroTik + Ruijie Network Design

Campus network

- Designed and configured campus-style network using MikroTik routing and Ruijie switching with VLAN segmentation and inter-VLAN routing.
- Implemented access control policies, spanning tree protocol, and trunk/link aggregation for resilient network topology.

Tech stack: MikroTik, Ruijie, VLAN, Inter-VLAN Routing, STP, Link Aggregation

Experience

Bangkit Academy

Feb 2023 – Jan 2025

Machine Learning Mentor & Advisor

- Guided learners through applied project execution in a structured cohort environment, reinforcing engineering habits around debugging and reproducible problem solving.
- Collaborated with instructors to refine learning materials and improve assignment clarity for a more execution-focused learning path.

ZettaByte Pte Ltd.

May 2022 – Aug 2022

AI Developer

- Built application components including database integration, chatbot functionality, and deployment workflows as part of a broader product implementation.
- Monitored development execution, tracked progress, and followed through on delivery plans during implementation cycles.

Education

Universitas Esa Unggul

Mar 2025 – Present

Computer Science

- Area of interest: Networking, Infrastructure, Distributed Systems
- GPA: 4.00

Universitas Bunda Mulia

Aug 2019 – May 2024

Hospitality and Tourism

- GPA: 3.67
- TOEFL equivalent score: 567
- Recognition: Mahasiswa Berprestasi

Bangkit Academy led by Google, Tokopedia, Gojek & Traveloka

Jan 2022 – Jul 2022

Machine Learning

- GPA equivalent score: 4.0
